## Farming

### Vegetables

Our farm lands have been prepared after our first harvest of cassava. New plantation of cassava is being done. Also,

the farm has grown potatoes which is our first time of engaging in it. And we are in great hope for a good harvest in 4 months time.

### Piggery

We had 9 piglets in the second quarter of this year and they are doing well. They have been detached from their mothers and have been put into their own pens so that their mothers can continue to reproduce.

## Fish farm

- The fish farm is ongoing and doing well. About 500 fishes who are between 700G and 1KG are ready for the market.

## **WIDOWS**

We have increased our support to reach out to 80 widows, who were visited in August third week and fourth week
